

Mannheim's sweet side

## **SCHOKINAG OPENS NEW PRODUCTION LINE FOR SOLID CHOCOLATE**

*Mannheim chocolate factory invests in innovation and growth*

MANNHEIM, 17/01/2019 – The Mannheim company SCHOKINAG approaches the next big step in its history. A large investment project has recently been completed. A new chipline with a production capacity of 3 tonnes per hour went live. Moreover, a new production line for white chocolate with significantly increased capacity is to start regular operation in March 2019.

Since 2016, 10 million euro have already been invested in these two projects and in other smaller projects under the new owners.

“It has been a major investment for us, which we put and still are putting a lot of work and care into”, says Managing Director Rolf Eiermann. “The subsequent increase in capacity, together with our highest product quality, further improved efficiency and a brand-new packaging to be introduced this spring, will allow us to offer an even wider range of chocolates to both industrial and artisanal users”.
